1)Create an html page with inline, internal, external CSS style sheet .

Ans:

index.html

```html
<html>
  <head>
    <title>Home Page</title>
    <link rel="stylesheet" href="./index.css">
  </head>
  <style>
    .class1{
      color: brown;

    }
  </style>

  <body>

    <h1 style="color: blue;">This is inline CSS</h1>

    <h1 class="class1">This is internal CSS</h1>
    <img src="F:\programcode\flower.jpg">
    <h1 class="class2">This is external CSS</h1>
    <h2 class="class1">Hello world</h2>
    <P class="2">Web programming refers to the writing, markup and coding involved in Web
```

development, which includes Web content, Web client and server scripting and network security.
The most common languages used for Web programming are XML, HTML, JavaScript, Perl 5
and PHP. Web programming is different from just programming, which requires
interdisciplinary knowledge on the application area, client and server scripting, and database
technology.

```
        </P>

      </body>

    </html>
```

#index.css

```
<!DOCTYPE html>
.class2{
    color: rgb(85, 5, 58);
}
p{
    text-indent: 900px;
    line-height: 1.6;
    word-spacing: 40px;
    margin-top: auto;
    margin-bottom: 40px;
    margin-left: 40px;
    margin-right: 40px;
}
body{
    background-color: bisque;
    background-image:url(flower.jpg) ;
    background-repeat: repeat-x;
    background-attachment: fixed;
    background-position: center;
    text-align: center;

}
```

```
p{
    border-style:dashed;

    border-width: 20px;

    border-bottom: 50px;

    border-color: blue;

    border-radius: 30px;

}
h2{
    text-align: left;

    text-decoration: underline;

    text-transform: uppercase;

    }
```
